Project Phases and Tasks: SUST Autorickshaw Management System

1. Project Initiation:

- **Define Project Scope (1 hour):** Established the objectives, deliverables, and boundaries of the autorickshaw management system project. The scope was defined to ensure the system would address the needs of scheduling, registration, and payment processing.
- **Identify Stakeholders (1 day):** Identified all individuals and organizations affected by the project, including university administration, autorickshaw owners, drivers, and managers.
- **Project Proposal Approval (6 days):** Officially started the project with the submission and approval of the proposal by stakeholders.

2. Planning:

- **Requirement Gathering (5 days):** Gathered requirements for the autorickshaw management system, focusing on registration, scheduling, and payment functionalities. This information formed the basis for the system's features.
- **Feasibility Study (Not explicitly mentioned but implied in the requirement gathering and analysis phase):** Analyzed the technical, operational, and financial feasibility of the project.
- **Project Plan Development (Scope Phase):** The project plan outlined the schedule, resource allocation, risk mitigation strategies, and communication plan. This provided a clear roadmap for project execution.

3. Design:

- **System Architecture Design (5 days):** The high-level structure of the system was designed to ensure scalability and integration of various components like registration, scheduling, and payment modules.
- **Database Design (4 days):** The database design focused on creating a robust schema to handle autorickshaw schedules, owner and driver information, and payment data.
- **UI/UX Design (11 days):** The UI/UX design ensured that the system was user-friendly, with intuitive navigation and accessible features for all users, including administrators and autorickshaw operators.

4. Implementation:

- **Admin Section Development (7 days):** Developed the admin login, dashboard, access control, and profile pages.
 - **Admin Login Page (2 days):** Developed the admin login interface.
 - **Dashboard Page (3 days):** Created the admin dashboard interface.
 - **Admin Access and Profile Pages (1 day each):** Developed the access control and profile management pages.
- **Registration Module Development (6 days):** Developed the registration functionalities for owners, autorickshaws, drivers, and managers.

- **Owner Registration (2 days):** Implemented the owner registration functionality.
 - **Autorickshaw Registration (1 day):** Developed the autorickshaw registration process.
 - **Driver Registration (2 days):** Created the driver registration module.
 - **Manager Registration (1 day):** Developed the manager registration functionality.
- **Permission Module Development (3 days):** Created the authorization page and functionality for printing authorization copies.
 - **Dashboard and Scheduling (9 days):** Developed the dashboard for listing permitted/unpermitted entities and scheduling features.
 - **Permitted/Unpermitted Lists (4 days):** Developed pages to list permitted and unpermitted owners, drivers, managers, and autorickshaws.
 - **Schedule Creation and Display (4 days):** Implemented scheduling functionality and features to display available schedules.
 - **Payment Module Development (24 days):** Implemented payment processing functionalities and tracking.
 - **Payment Processing (Initial implementation on Sep 19):** Developed the payment processing features.
 - **Payment History (5 days):** Developed functionality to track and display payment history.

5. Testing:

- **Unit Testing (2 days):** Tested individual modules to ensure they worked as expected.
- **Integration Testing (Part of development phase):** Ensured that the frontend and backend components worked together seamlessly.
- **System Testing (7 days):** Validated the overall functionality of the system, including edge cases and overall performance.
- **Acceptance Testing (Part of system testing):** Ensured the system met stakeholder needs and expectations, providing feedback for final adjustments.

6. Documentation:

- **Review All User Documentation (5 days, Wed 10/25/23 - Tue 10/31/23):** The full team reviewed and finalized all user documentation, ensuring it was comprehensive and easy to understand. This included creating user manuals, help guides, and any other necessary documentation to support users in operating the autorickshaw management system.

Actual Work vs Remaining Work
